

ACCT 253

ACCT 253 Intermediate Management Accounting

3 Credits

This course expands on introductory cost and management accounting topics within the context of strategic decision-making. The focus is on a more detailed study of costs, costing systems, processes, and analytical techniques used in the planning and control of business operations. Topics include cost allocation, product costing, joint and by-product costing, spoilage, and inventory cost management. Students will use Excel to solve management accounting problems and scenarios.

Prerequisites

ACCT 252
