

ACCT 255

ACCT 255 Advanced Management Accounting

3 Credits

This course expands on introductory and intermediate cost and management accounting topics within the context of strategic decision-making. The focus is on a more detailed study of quantitative and non-quantitative information used in the planning and control of business operations. Topics include pricing decisions, transfer pricing, customer profitability strategy and analysis, analysis of cost behaviour, performance measurement, and continuous improvement methodologies. Learners will use Excel to solve management accounting problems and scenarios.

Prerequisites

ACCT 253
