

ACE 132

ACE 132 ID of Groundfish and other non- Salmonid Fishes of the Northwest Pacific

1 Credit

This course focuses on the identification of groundfish, herring, oolichan and other non-salmonid species commonly found on the northwest coast of BC. Topics include the identification, enumeration methods and life cycles of the aforementioned fish species. Habitat requirements, the basics of management strategies and the principles of commercial fishing methods will be explained. One or two fisheries will be observed.

Prerequisites

English Studies 10, English Peoples 10 or equivalent and Principles of Math 10 or equivalent
