## **ENGL 231 Literature and the Environment**

3 Credits

The environment inflects all knowledge now. Creative writers bring our attention to our lapses, our struggles, and our success against compromises that would lessen our place in the world. Literature concerned with the environment presents the story of the place we inhabit, and it makes us aware of our regard for that place as if it were alive, which, of course, it is. In the work that we consider, we will find the analysis, drama, and dilemmas of thought and action that influence difficult decisions on the future.
