

PNAC 135

PNAC 135 Variations in Health A

2 Credits

This course provides the learner with the foundations of disease and illness across the lifespan. Learners will gain an understanding of pathophysiological alterations of body systems. Nursing management of disease and illness across the lifespan with an emphasis on interventions and treatment is also discussed. The learners understanding of pathophysiology as it relates to the ageing process and selected chronic illness will increase. A major focus of this course is on the care of the older adult experiencing a health challenge. Cultural diversity in healing practices are explored as well as evidence-informed research and practice.

Prerequisites

Admission to Practical Nursing Program; Human Anatomy and Physiology for Practical Nurses with a minimum of 65% or equivalent.
