

PSYC 101

PSYC 101 Introductory Psychology I

3 Credits

This course provides learners with an introduction to theories, concepts, and research findings in psychology. Specific topics covered include methods of psychological research, psychobiology, sensation, perception, consciousness, human development, learning and habit formation, and memory. Some practical applications of these topics for the learners' personal lives and careers are also introduced. Whenever possible learners will be encouraged to engage in cross-cultural analyses of psychological phenomenon through an Indigenous lens.
